

How I accidentally became fractional

Using

Astro + Supabase + Cloudflare Pages

The Tech Stack

Astro

- Optimized performance with island architecture
- Ships minimal JS to the browser by default
- Framework agnostic (React, Vue, Svelte - use what you need)
- Excellent DX with content-focused approach

Supabase

- Full-featured Postgres database with real-time capabilities
- Built-in auth with social providers
- Edge functions for custom logic
- Row-level security for robust data protection

Cloudflare Pages

- Global CDN with edge presence
- CI/CD triggered by Git changes
- Generous free tier
- Seamless integration with Cloudflare's ecosystem
